EDUCATION

George Mason University

Fairfax, VA

Bachelor of Science in Information Technology, Concentration in Cybersecurity | May 2026

- Honors: Dean's List (Spring 2024 – Spring 2026)
- Relevant Coursework: Information Defense Technologies; Network Security; Security Administration of Linux Systems; Cybersecurity of Data & Software; Security Accreditation of Information Systems

EXPERIENCE

DHL Global Forwarding

Sterling, VA | Air Export Specialist | January 2023 – Present

- Orchestrated 100+ international air freight shipments per month, maintaining full compliance with U.S. Customs AES filings and federal trade-control regulations.
- Served as designated system superuser; trained 10+ team members on internal logistics platforms and reduced troubleshooting time by 30%.
- Sustained operational KPIs above 95% compliance, validated quarterly through Control Tower audits, while supporting onboarding of 5+ enterprise clients.

Worldwide Flight Services

Sterling, VA | Office Agent | May 2018 – September 2021

- Authored and verified 1,000+ bills of lading, reducing documentation discrepancies by 20% through tightened review controls.
- Processed clearances with local, state, and federal agencies, sustaining 100% regulatory compliance across all shipment cycles.

PROJECTS

NG5 LMS Web Application | React, TypeScript, Firebase, OWASP, NIST | GMU IT 493 Capstone

- Architected a full-stack, agentic-AI-first learning management system delivering 12 production features including AI tutoring, voice-command interface, and an early-warning student-risk system.
- Conducted an OWASP-aligned security audit that lifted application security score from 65% to 95%; engineered RBAC and XSS mitigations and validated FERPA compliance end to end as four-engineer Team Lead.

Security+ AI Tracker | TypeScript, Firebase Cloud Functions, Google Gemini, YouTube Data API | Personal Project

- Engineered a unified Security+ study platform consolidating Professor Messer curriculum, TryHackMe and HackTheBox lab bridges, and AI-driven study insights into a single learner dashboard.
- Deployed Google Gemini through server-side Cloud Functions under a zero-trust architecture, fully isolating API credentials and user data from the client surface.

TryHackMe Penetration Testing Labs | Kali Linux, Parrot OS, Burp Suite, Hydra, Nmap | Personal Project

- Completed 30+ offensive-security labs spanning privilege escalation, web exploitation, and vulnerability analysis using Burp Suite, Hydra, and Nmap.

Wireshark Network Analysis | Wireshark, TShark, tcpdump | Personal Project

- Dissected 1,000+ packets across TCP handshakes, DNS resolution, and HTTP traffic; surfaced 5+ traffic anomalies and improved baseline detection accuracy by 20%.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, C#, JavaScript, TypeScript, SQL, HTML, Tailwind CSS

Tools & Platforms: AWS EC2, Azure, Linux (Ubuntu, Kali, Parrot), Windows, VirtualBox, VMware, Git, Splunk, Wireshark, Burp Suite, Firebase, MySQL

Security & Frameworks: OWASP Top 10, NIST RMF, FERPA, RBAC, Zero-Trust Architecture, Network Forensics, Vulnerability Assessment
